

For the Bee Garden

There are arguments from both sides of the aisle why honeybee colonies collapse and beekeepers are finding it harder and harder to sustain their bees. It is a confusing topic with many different factors. But good news! There is a simple thing you can do TODAY to help the honeybees thrive – **focus on planting the plants that honeybees love most!**

**note: some listed plants may not be in stock or are only stocked seasonally.
Let us know how we can help you!*

H O N E Y B E E S
