

SHEDDING SOME LIGHT ON LIGHT REQUIREMENTS FOR OUTDOOR PLANTS

FULL SUN =

At least 6 hours of direct sunlight

PARTIAL SHADE =

3 to 6 hours of direct sunlight

FULL SHADE =

Less than 3 hours of direct sunlight
(Like under a tree or on the north side of your house)

THINGS TO KEEP IN MIND

- ▶ Morning or evening sunlight is gentler than the afternoon rays.
- ▶ In the Winter, watch where the snow melts first and last in your yard.
- ▶ Light isn't the only important factor. Also consider moisture levels and soil quality before deciding on the right plant for the right location.
